Micro Data Center Solutions can meet the information technology and communications infrastructure needs of small and medium-sized companies, industrial facilities, offices, branches and dealer locations and can accommodate all the necessary devices.

Description

LANDE Micro Data Center Solutions can meet the information technology and communications infrastructure needs of small and medium-sized companies, industrial facilities, offices, branches and dealer locations and can accommodate all the necessary devices. In addition, taking into account the architectural problems of the facilities, cooling, energy and security needs are integrated products in a unique structure. You don't need any special room for LANDE Micro Datacenter Solutions.
